RAIL VS. BOARD FENCES.

Rail fences occupy, on an average, eighteen feet of land, board fences only six, in plowed land. Rail fences are not so objectionable in meadows and pastures; still there is one half to two thirds difference in favor of boards and full two thirds in saving material. Timber can be made into board fences that cannot be used in rail fences. Board fences withstand wind which rail hardly can, even staked and capped. Some may object that frost pulls up fence posts, and they cannot be put up as easily as to lay up rails.

I will give a description of my board fences, manner of building, &c. I cut logs for boards of chestnut, black or white oak, in fall or winter. For each rod of fence it requires one board each, ten, eight, seven, six, and five inches in width; also one five inch board extra for buttons on every four posts or two rods of fence. Fence posts made of good white oak, sawed 5 by 6 at the bottom, and 2 by 5 at the top, leaving 5 by 5 where they pass.

DAYTON SIGLER.

A PRETTY SHARP REPORT.

Two young ladies very genteelly dressed, were riding along Fifth street, in a buss. One of them, whose features were more remarkable for an excessive prominence of nose than anything else, exhibited to the other a daguerreotype of herself, which she said she had just had taken, and they were engaged in discussing its merits, when an elderly lady got into the bus at the corner of Elm and Fifth streets. She was evidently one of those inquisitive good natured souls who take a great deal of innocent liberty in the world, without thinking any harm. After riding a square or so, she reached out her hand and said to the lady with the picture: "Please let me look at it." Her modest request was met with an indignant frown, and as the reply came was returned to the lady's pocket, "It's none of your business!"

The old lady settled back in her seat very complacently, when the companion of the one with the picture asked: "What do you wish to do with it?" "Oh, nothing," replied the old lady, "I only wanted to see how successfully the artist has put such a nose on so small a plate."

The omnibus was full, and the shouts of laughter which followed the retort could have been heard a full square. The lady with the daguerreotype covered her face with her veil, and dropped the subject during the remainder of the ride.—*Cincinnati Gazette.*

Lucy Stone says there is cotton in the ears of men and hope in the bosoms of women.

Got that wrong end first, Lucy!

E. S. HAWKINS,
General Agent for the sale and purchase of Real Estate, Negroes, &c.,

67 I will pay the market price for Negroes brought to my office.

Negroes constantly on hand.
Office, No. 15, Cedar Street, formerly occupied by Theo. G. James,

NASHVILLE, TENNESSEE.

Feb 13

JOHN LOCKEN,
BOOK BINDER,
Soc. Meth. Publishing House,
Nashville, Tenn.

Blank books of superior quality manufactured for banks and the counting room, and books rebound for the library or parlor. Call and see specimens.

[Feb 14]

MERCHANT TAILORING,

NEW FURNITURE SHOP, Nashville, Tennessee.

The undersigned would respectfully inform his Public, that he has just opened an extensive stock of superior Furniture, Mattresses, &c., in the spacious workshop in No. 17, Foggy Building, on College street, three doors North of A. Hamilton's warehouse. It is my intention to keep constantly on hand the best Furniture of Home and Eastern manufacture, at the lowest prices. I will devote particular attention to the treatment of all skin diseases, rheumatism, sciatica, pleurisy, epilepsy, dyspepsia, piles, and all derangements of the stomach and intestines, and also to all chronic female diseases, and he will call daily on the eye and ear, without the use of the knife or needle, and he has constantly on hand an excellent assortment of artificial Eyes and tympanums, (or Ear Drums) suitable for either sex and all ages—inserted in five minutes.

Dr. BAKER has made a new discovery of a fluid that will produce perfect absorption of the excretions, and restore perfect vision to the eye, without the use of the Linseed oil. Dr. Baker can produce one thousand certificates of his perfect success in curing Cancer, old sores or Ulcers, Fistulas, Scrofula, Tumors or Cancerous growths, and Classical education at the same time affording those, from the study of the Bible, a comfortable and cheap education.

First Furniture Shop on College street North of broad.

A Substitute for Burning Fluid.

brilliant, economical, safe.

A. H. HICK'S,
45, Public Square,
Nashville, Tennessee.

THE IMPROVED VIENNA

LAMP

for burning Petroleum and Kerosene COAL OIL. This is decidedly the best

COAL OIL LAMP

in market. It produces a more brilliant and longer light than Spirit, Oil, Candle or Burning Fluid, at about one half the expense and the oil is not explosive. A beautiful light for two cents a night. A gallon of Coal Oil (at \$1.) will burn 160 hours, or 30 evenings of four hours each. And by giving a light equal to three sperm candlesticks. By slightly depressing the wick, a light sufficient for ordinary purposes may be produced at a cost of half a cent an hour.
